Ձեռնարկությունների Եվրոպական Ցանցի գործարար համագործակցության կենտրոնի Հայաստանում առաջարկների և հարցումների Նոյեմբեր 2017թ. Երևան, Հայաստան
Հարգիլի գործընկերներ,
Դուք կարողեք գրանցվել Ձեռնարկությունների Եվրոպական Ցանցի կայքում և անմիջապես ստանալ տեխնոլոգիական առաջարկներ և հարցումներ ըստ Ձեր նախընտրած ոլորտի` http://een.ec.europa.eu/services/technology-transfer

Եթե դուք փնտրում եք գործընկեր արտասահմանում կամ նոր շուկա Ձեր տեխնոլոգիական նորարարությունների համար և ցանկություն ունեք ներգրավվել ցանցի տվյալների բազայում, խնդրում ենք դիմել գործարար համագործակցության կենտրոնՀՀ ԳԱԱ Միջազգային Գիտատեխնոլոգիական Ծրագրերի Բաժին
Հեռ. 525432, էլ.փոստ anip@sci.am
համագործակցության հայտի ձևեր և այլ համապատասխան տեղեկատվություն ստանալու համար 

Business Support on Your Doorstep
HORIZON 2020 AND R&D PARTNER SEARCH

1. **Horizon 2020** project, particularly in the fields of activities that are compatible with local conditions, and to support those in the development of necessary capacities:

2. **EUROSTARS**: The project team seeks partners in the field of technologies, with new and mature projects of the Horizon 2020 program, and activities for local community development:

3. **H2020-MSCA-ITN**: The project team seeks partners to implement international programs for the development of new educational modules:

### TECHNOLOGY REQUESTS

1. **Horizon 2020** promotes solutions to the problem, with patents and technology:

2. **Forschungs** to research and development programs, with local and international opportunities:

3. **Horizon 2020** promotes the activities, with local and international experiences:

4. **Web** is developing algorithms for the development of technologies and e-commerce data analysis, focusing on the analysis of the technology development capacity:

### TECHNOLOGY OFFERS

1. **Light emitting diodes (LED)** offer commercial production with the latest LED technologies and technology development programs:

2. **Forschungs** team offers technological development programs, with local and international technologies:

3. **Web** offers experienced and professional services in technology development programs, focusing on the project development capacity.
1. H2020 project for virtual entrepreneurship center with various innovative activities that support the development of the local community

A non-profit organization from Bosnia and Herzegovina engaged in supporting local community in Herzegovina searches for members of project consortium within the H2020 programme. The project utilizes R&D with the objective to boost entrepreneurship skills of local community members. Industry partners are requested as well as educational institutions, both interested in innovative products development for local community. Expertise sought: local community management, entrepreneurship and ICT.

2. EUROSTARS. Technological partners for the design and development of an hydro-generator with an innovative efficient horizontal reaction turbine

A Spanish SME is preparing a Eurostars project in order to develop, manufacture and commercialize a new generation hydro-generator with efficient and innovative horizontal reaction turbine that may work in rivers of low and high speeds. The turbine is intended to be compact, easy to install and efficient. The company is looking for technological partners for the development of the horizontally symmetrical sealed generator and complex geometry ducts.

2. **Looking for a custom conspicuity tape manufacturer for traffic/outdoor use**

An Israeli start-up is developing a hardware solution for autonomous driving & ADAS applications, requiring custom-manufactured high-intensity reflective conspicuity tape. A partner with a thin-film roll-to-roll polymer coating capability is sought to manufacture the tape to specific recipes. An R&D project to process many samples as a feasibility demo is envisaged. Cooperation through a research, technical or manufacturing agreement is sought with a large industrial partner.

3. **Seeking catalyst for efficient conversion of carbon dioxide and hydrogen to methanol**

A large German special chemical company is seeking novel catalyst for efficient conversion of CO2 rich off gases together with hydrogen to methanol. Ideally such alternative catalysts should be based on easily available base metals and accessible by conventional preparation techniques such as precipitation or impregnation. Precious metals as the active mass would be an option as well. The project can be carried out in the framework of a joint venture, license or research cooperation agreement.

4. **A web application developer is looking for experienced partners in matching algorithms and scraping data technologies from e-commerce websites**

A French company dealing with the development of web applications is currently deploying a price monitoring system dedicated to online brands, manufacturers and online stores. They are looking for experienced partners in scraping data from website, App and other sources like Ajax technology. Then they are looking for efficient algorithms for data product matching (semantic, images, statistics...). Both technologies must be able to improve the system offered. Technical cooperation is sought.

1. **Ultra high performance patented light emitting diode (LED) drivers offered to manufacturers of LEDs under a licence agreement**

A UK company has invented a new generation energy saving LED driver that improves the efficiency and performance of LED lighting. The UK company’s patented invention and will drive any LED lamp with power output from 8W to 200W. The UK company would like to licence the LED driver technology to manufacturers of LED lamps and drivers.

2. **French SME offer quality control equipments based on deflectometry**

A French SME offers innovative and non-destructive quality control machines based on deflectometry for the automotive, aeronautic and aerospatial industry. Its patented vision technology is dedicated to the automated inspection and detection of defects on shiny surfaces (plastics, composites, metal) or transparent materials (glass, polymers). The French SME is looking for a partner to conclude a commercial agreement with technical assistance.

3. **Sun sensors and solar tracking systems for the renewable energy industry**

A Spanish technology based company specialized in Micro Electro Mechanical Systems technology (MEMS) offers high accurate sun sensors and solar tracking systems for the renewable energy industry. These innovative solar tracking technologies significantly improve the efficiency and thus profitability of solar power plants. The company is looking for commercial with technical assistance, license, R&D cooperation and/or financial agreements.
